SERVICES

We offer home visits by our Doctors for medical conditions requiring attention when your own GP is not available. Once one of our afterhours Dr’s have seen you, we will send the treatment notes and relevant information to your normal GP for follow up and ongoing medical attention.

Please note that we prioritise patients depending on their medical condition, the area our Locum Doctor is working in and certain other factors. If any time you feel your condition has deteriorated, please call our call centre again so that we can advise you of appropriate action to take.

MEDVISIT Dr’s carry a supply of emergency medicines with them and will be able to administer these when medically necessary. They also carry majority of normally prescribed medicines and will administer starting doses so that the patient can fill in the prescription the following morning.
